ARSHAD PASHA

Full Stack Web Developer | AI/ML & Cybersecurity Enthusiast

arshadpashaintern@gmail.com | +91 7760554350 | Hunsur, Mysore, Karnataka

Linkedin | GitHub | arshadpasha.netlify.app

SUMMARY

I'm **Full Stack Web Developer With Skills** of **Front and back-end** development tools such as **ReactJS, NextJS** and **MySQL**. Along with strong skills in **Automation** and **cybersecurity**. **Experience Projects Undertaken :** I have **designed and developed 20+ real time projects** like **UiPath** powered RPA workflows, command on **Expert level with GitHub And GitLab** for version control (pushing code,creating repository and working with team),secure application using **Encryption and Ethical hacking**. **Google Cloud Certified, Infosys Springboard** and the **Oracle Cloud Certificates** with practical experience on **Vertex AI, API integration and datadriven solutions**. A proven contributor in **hackathons, open-source ,projects, and internships**, passionate about building scalable, automated, and secure digital solutions.

REAL-WORLD PROJECTS

All Project Link's

AI Resume Builder — Full Stack (Next.js + Python LLM Integration) GitHub | Demo

- Developed an AI-powered resume builder that automatically tailors resumes based on job descriptions.
- Built with Next.js for the frontend and Python (LLM backend) for AI-powered content optimization.

KIOSK OS – Automated Library Access System (2025) GitHub | Demo

- Built a Linux-based Kiosk OS to auto-launch and log in to the library management software, reducing repetitive manual steps.
- Added auto-refresh optimization for faster ID card scanning, improving efficiency for staff and students.

Fooddala – Full-Stack Food Delivery Platform (Web & Android App) GitHub | Live Demo

- Designed and developed a full-stack food delivery platform with a Next.js web app, Flutter Android app, and Node.js/Express backend, supporting multi-restaurant browsing and order placement.

Library Management System GitHub | Demo

- Developed a full-stack web application for managing library operations with features including user login, book/member CRUD, issue and return tracking, real-time search, and Excel export. Implemented secure password hashing and SQL injection prevention. Deployed using Railway with external MySQL database integration.

Chrome Extension - Personal Productivity Tool GitHub | Demo

- Developed a lightweight Chrome extension for daily productivity, built for personal use. Features include quick task notes, localStorage-based data saving, and instant popup interface for fast access. Designed to simplify routine workflows and boost daily efficiency inside the browser.

Encrypt, Decrypt, Images Cybersecurity GitHub | Live Demo

- Developed an advanced GUI-based tool during my cybersecurity internship that integrates steganography to securely embed and extract encrypted text within images. Users can select a cover image, encrypt text with a custom key, hide it without visible quality loss, and later decrypt it with the correct key. This project enhanced my practical skills in image processing, cryptography, and secure data hiding techniques.

Criminal-Identification-System GitHub | Demo

- with SMS alert integration (via Pushover) for automated criminal detection. Included three modules: Registration, Detection, and Live Video Surveillance. If a match is found in the SQLite database, the system triggers an alert with a sound notification and sends an instant SMS to authorities.

Data Entry Automation with UiPath GitHub | Demo

- Built an OCR-powered automation bot using UiPath with Tesseract OCR + C#/VB.NET integrations.
- Automated extraction of text from uncopyable right-to-left data fields and transferred it accurately into structured formats.

WORK EXPERIENCE

Associate Analyst **October 2026 – Present**

Deloitte USI

- Working in a professional corporate environment, contributing to assigned business and analytical activities.
- Applying analytical thinking, problem-solving, and technical skills to support team objectives.
- Collaborating with team members to complete tasks accurately and meet organizational requirements.

ReactJS Developer Intern **July 2025 – Jan 2026**

Antmore Labs Private Limited (Product: The Good Game Theory)

- Worked with **PhaserJS** to develop interactive, game-like web interfaces for engaging user experiences.
- Independently used **ReactJS** and **NextJS** to enhance site responsiveness, **functionality**, and overall performance.
- Converted complete **UI/UX designs** into fully functional web pages useing **ReactJS**, deploying them successfully in production.

Infosys Springboard Internship 6.0

- Served as Team Leader / Sub-Team Leader, leading a team of 8 members, assigning tasks, coordinating activities, and ensuring timely completion of internship objectives.

Junior Web Developer Intern **March 2026 – May 2026**

Cosmonet AI — Bangalore, India

- Developed and successfully deployed the **Cosmonet.AI** platform from scratch using modern web technologies like **Next.js and React**.
- Handled end-to-end development including frontend design, backend integration, and deployment.
- Collaborated with the team to build scalable and user-friendly AI-based web solutions.
- Improved application performance, responsiveness, and overall user experience.
- Actively participated in team communication, problem-solving, and agile workflows.

INTERNSHIPS

Artificial Intelligence and Data Analytics Intern **June 2025 - July 2025**

(AICTE, Shell India Markets Private Limited, Edunet Foundation)

- Completed a 4-week virtual internship focused on Al, Data Analytics, and "Green Skills".

Web Development Intern (Nexus Logic Technologies) **March 2025 - May 2025**

- Contributed to web development projects, demonstrating a strong understanding of modern web technologies.

Full Stack Development Intern (Micro IT) **April 2025 (1-Month Program)**

- Successfully completed a 4-week program focused on the foundational principles and applications of Artificial Intelligence.

Foundations of Al Intern (Edunet Foundation - Microsoft Initiative) **April 2025 - May 2025**

- Contributed to web development projects, demonstrating a strong understanding of modern web technologies.

Cyber Security Intern (Edunet Foundation, AICTE, IBM SkillsBuild) **Culminated June 2025**

- Contributed to web development projects, demonstrating a strong understanding of modern web technologies.

Data Analytics Job Simulation (Deloitte Australia) **June 2025**

- Completed a comprehensive virtual experience, gaining practical exposure to real-world data analytics challenges.

Cybersecurity Virtual Experience Program (Deloitte - Forage) **June 2025**

- Gained hands-on experience in real-world cybersecurity scenarios and tasks, simulating the role of a cybersecurity analyst.

SKILLS

- **Programming Languages:** Basics of Python, JavaScript, Java, C, C++, VB, C#
- **Web Technologies & Frameworks:** HTML, CSS, ReactJS, Flask, NextJS
- **Database Systems:** MySQL, SQLite, JSON (for data handling)
- **Cloud Platforms & AI/ML:** Google Cloud Platform (GCP), Vertex AI, Gemini API, DeepSeek API, OpenRouter, Data Science Fundamentals.
- **DevOps & Version Control:** Git, GitHub, GitHub Actions, GitLab
- **Automation & RPA:** UiPath, Robotic Process Automation (RPA)
- **Operating Systems:** Windows, Ubuntu, Kali Linux, Arch Linux, Porteus Kiosk
- **Deployment & Hosting:** Netlify, Render.com, Railway, InfinityFree, 000webhost
- **Cybersecurity & Ethical Hacking:** Kali Linux (Self-Learned, 2021)

HACKATHONS

Infosys Global Hackathon : **July 11-12, 2025**

- It was 2-day challenge, gaining insights into large-scale project execution and industrial workflows.
- Our team was selected online from many participants, showing strong project potential.
- Acquired new skills and practical experience in a real-time, competitive environment.

AITHON (AI Tools Hackathon) :

- Learned to leverage Al tools for web creation, image generation, and data analysis to build

Hindustan College Hackathon 2024:

- Developed a health and wellness website as a first hackathon project, gaining valuable experience in competitive, time-bound project development.

Actively participated in multiple inter-college fests and coding events, gaining hands-on experience in competitive programming and collaborative problem-solving. All Hakcthon Certifications

CERTIFICATIONS

- **Oracle Cloud Infrastructure (OCI) – AI Foundations Associate & DevOps Professional** (Valid till Oct 2027)
- **Google Cloud – Generative AI with API, Vertex AI (Multi-Modal)** → Cloud Skill Boost Profile
- **Infosys Springboard – Introduction to Artificial Intelligence & Data Science**
- **Cybersecurity & Ethical Hacking – Kali Linux** (Self-Learned, 2021)
- **RPA Developer Training – UiPath** (Service Routine Training, 2022)
- **Advanced Java Programming** – Successfully completed certified course in Java & Advanced Java
- **Awareness Workshop Certification** – Completed 3-day master workshop on Workplace Safety (PoSH Act 2013) & Anti-Ragging Laws.
- **YouTube Tech Courses – Various Topics** (Self-Learning)

LEADERSHIP & AWARDS

- **Education Vice-Captain** – PU College
- **Class Representative** – Degree College (2nd Year)
- **Open-Source Contributor :** Social Summer of Code (SSOC)
- **2nd Prize** – Website Development Competition at PU Level
- **1st Prize** – Website Development Competition at Inter-College Fest (Degree Level)

EDUCATION

Seshadripuram Degree College , Mysore — **9.31 CGPA** — **2023 - 2026**
Bachelor of Computer Applications (BCA)
University of Mysore

St. Joseph’s Composite PU College, — **81.50 %** — **2021 - 2023**
EBAC
Karnataka PU Board

Talent High School, Hunsur — **83.84 %** — **2020 - 2021**
SSLC
Karnataka Secondary Education Examination Board
